

PHOTOCELL COVER

UK-XP20 COVER

FAAC

Protective cover for the XP20 photocell range.

Protects against small knocks and environmental factors including rain, hail and snow.

Produced in a 1.5mm thick Zintec steel (mild steel treated with a layer of zinc) which protects the steel against corrosion and rust

Painted in RAL 9005 jet black. This colour is a polyester solid tone powder coat and has a glossy finish.

The Cover can easily be retrofitted to most existing installations. It clamps into place using existing photocell fixings

Models it fits:

XP20D	785102
XP20B D	785103
XP20W D	785104

Due to the design of the housing 180° option is not available.

Part Number for single cover
