Life's Easier When You Stay Connected...

No need to access the control board, Simply Connect is a tool that allows you to effectively manage maintenance servicing and improve your business efficiency. By simply checking on your mobile device, you can see the status of all connected FAAC automation systems, check simple anomalies, and manage on-site visits.

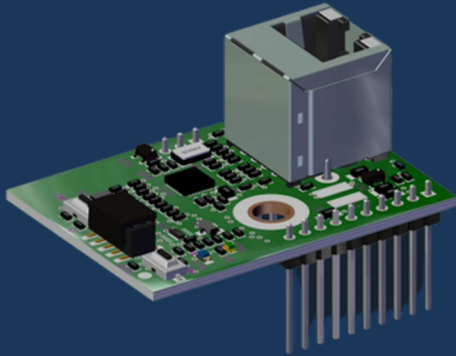

Offer your customers an upgrade on their existing FAAC automation, or simply add Simply Connect to your next compatible installation to stay connected. You'll receive fault notifications in real-time and have the ability to provide technical support from wherever you are!

A communication protocol based on E2EE encryption ensures the integrity and confidentiality of data in compliance with GDPR.

SIMPLY CONNECT

Simply Connect is compatible with a range of FAAC products, from our gate operators, to our range of automatic doors and the iconic B680 barrier!

Gate Operators

Connect and operate any of these devices seamlessly, from anywhere, at anytime with the Simply Connect app.

B680 Barrier

Automatic Doors

Our full range of sliding door operators are now Simply Connect compatible!

Why Simply Connect Pro?

Designed with you in mind:

-  Install comfortably and conveniently in any weather. Smartphone setup means you can programme from the comfort of your van!
-  Programme with added detail through the app. Access settings that aren't available when programming directly on the control board.
-  Manage FDS Remotes from anywhere. Add, remove and post replacement remotes directly to your customer.
-  Realtime fault finding, notifications and user management on one intuitive dashboard.
